ISSN 1749-5083

A **Practical Guide to Digital Copyright Law** examines the challenges raised in the copyright field by three new potential modes of infringement: peer-to-peer, linking and digital libraries, also probing the Digital Rights Management field. The book provides an analysis of legislation and jurisprudence in conjunction with technology, offering a clear approach to the complex and changing area of digital copyright law. The subject is examined from an international perspective, required to deal with the borderless nature of this multi-faceted topic.

Patricia Akester Ph.D. is a Leverhulme Fellow at the Centre for Intellectual Property and Information Law, Faculty of Law, University of Cambridge and an Intellectual Property Visiting Professor at the Catholic University of Lisbon. She is also a member of the Portuguese Bar Association, an Executive Committee Member of the Portuguese Group of Association Littéraire et Artistique Internationale and a Member of the British Literary and Artistic Copyright Association.

European Intellectual Property Review (EIPR) is a new practice-focused series of titles that provides thorough guidance and analysis across a whole range of Intellectual Property subjects. Focusing on areas not always covered in the major text books, where there is a need for information on practice, tactics and strategy on an international scale. The EIPR Practice Series is an essential addition to your library, with titles which will be suitable for use by all your Intellectual Property Teams.
